

Twin plan Banov - Sørreisa

- Same students through the whole project
 - o Size: 35 pupils (8A/B) from Czech Republic and 50 pupils (9A/B) from Norway
- We will try to exchange all the students during the project period.

Part 1a) The tree ring project

Both schools will implement the activities according to the tree ring project.

Part 1b) Globe activity - Weather registration: Temperature, clouds, rain, snow, pH

Both school will do registrations and compare it with each other. The registration will be registered on the Globe programs website.

Part 2) Water – small streams and still water

We will look at the environment.

- What are the differences between the two countries?
- What are the reasons for these differences?

Surroundings, pH, pollution, oxygen content, temperature, spices, seabed condition

Step 1:

Getting to know each other

- Who are we
 - o exchange email-addresses
 - Norway twin some of their students – then we have 35 “couples”
 - o Share information about themselves
 - Interests and hobbies
- Presentation of the country
 - o exhibition – each country sends pictures and information
 - o students make one presentation together
 - culture
 - music
 - traditions
 - recipes
 - language – phrases
- Facebook
 - o We make a group only for our students
 - Communication and messages

Step 2:

Part 1a - Each school decide when they do this part

Part 1b - Banov are already doing weather registration and will continuing this work. Sørreisa will start as soon as possible.

Part 2 - Spring 2012: Both schools will do the part with the water research
